-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 3/4/2011 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Drawings

The drawings were received on 3/4/2011. These drawings are accepted.

Claim Rejections - 35 USC § 112

The 112 rejections have been withdrawn in light of the applicant's remarks filed on 3/4/2011.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-16 and 18-27 are rejected under 35 U.S.C. 102(e) as being anticipated by Bowman et al. (US 7,520,867).

Bowman et al. discloses an infusion set (10) comprising an infusion part (20, 26) for insertion into a patient and a connector (16) for connecting the infusion part with a

medical device through a tube, the connector being axially displaceable relative to the infusion part, the infusion part comprising an adhesive support (20), a base (26) connected to the adhesive support, the base part including a first set of guides (82 and the grooves between 82) and at least two retention devices (84, there are at least two elements 84) for releasably locking the connector to the infusion part, said retention devices extending upwardly from an upper surface of the base (element 84 is connected to a portion of the base extending upwardly from the upper surface), a first cannula (76) extending from said base and being in fluid communication with a cavity, said cavity being adapted to receive a second cannula (52) extending from the connector, wherein said second cannula is in fluid communication with the tube, and the connector comprising a second set of guides (60) adapted to fit with the first set of guides and at least two arms (46) adapted to fit with the retention devices (54 fits into 84), the arms are movable in a laterally inward direction, in a laterally outward direction and in an upward direction away from the base such that movement of the arms in either the laterally inward direction, the laterally outward direction or the upward direction allows disengagement of the arms from the retention devices.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

If applicant feels like there are limitations which can be added to patentably distinguish the independent claims over the prior art, the applicant is invited to contact the examiner to discuss such limitations.
